Beautiful You introduces Appearance Medicine Doctor, **Dr Ellen Selkon** ...

Ellen Selkon has over 12 years practicing experience in health care as a qualified Doctor. Ellen immigrated to New Zealand from South Africa with her husband whom she started a medical centre in Auckland with.

Dr Selkon recognised she had growing number of female patients who would often discuss their ageing concerns with her. One patient had undergone Appearance Medicine procedures and Dr Selkon noticed the change not only in her outward appearance, but in her confidence and self esteem. Dr Selkon says her patient not only looked rejuvenated, but felt it too.

“This was one of the reasons that motivated me to obtain my second specialisation through the New Zealand College of Appearance Medicine. I love the way it combines helping people with medicine, it makes going to work a more rewarding experience.”

Dr Selkon performs Dermal Fillers – her favourite procedure. Fillers give immediate results and are very safe. This procedure plumps nasolabial facial lines that run down from the nose to the side of the lips – arguably one of the strongest ageing ‘giveaways’ on women. They can

also be used to fill other facial lines, volumise the face and rejuvenate the lips.

“I love being able to help people with frustrating medical conditions such as migraines, drooling, muscle spasms and excessive sweating. It is a wonderful feeling, to be able to improve someone’s quality of life.”

Dr Selkon operates out of three different clinics – Beverley Hills Skin & Body, Beauty & Spa Therapy and The Skin Institute, Westgate. She performs an extensive range of procedures, including the more popular such as Chemical Peels, Botulinum Toxin, Fillers and the removal of non cancerous skin lesions with a specialised machine that leaves minimal scarring.

Dr Selkon enjoys being able to tailor individual treatments according to her clients needs and is always excited to hear about new techniques and products that are constantly emerging.

“We no longer have to age at the rate our genes dictate but can prolong a more youthful appearance with the art of Appearance Medicine techniques.”

Call Ellen today to discuss your concerns or to book a complimentary skin consultation.
